

**Date: 05/08/2026****BE Project Synopsis & Approval AY-2026-27**

- 1) Group No. 13**
- 2) Title of the project:** Fire Department Inspection & NOC Management
- 3) Domain:** E-Governance Smart Automation
- 4) Literature Survey(Brief about papers referred(min.5) and explain key points and challenges /weakness observed by you in given papers):** Fire safety inspection and NOC processes involve multiple stages such as application submission, document verification, inspection scheduling, inspection reporting, compliance checking, and NOC approval. Existing studies and systems focus on individual aspects of fire safety management or digital inspection processes. However, there is a need for an integrated platform that manages the complete inspection and NOC workflow digitally, improves coordination between applicants and fire department officials, and provides proper tracking of applications and inspection status.

Sr. No.	Title of Paper	Journal/Conference & Year	Author	Key Points	Challenges/Remarks
1	Fire Safety Management System	Research Paper	—	Digital management of fire safety information and processes	Limited end-to-end NOC workflow
2	Fire Inspection and Risk Assessment	Research Paper	—	Fire-risk assessment and inspection procedures	Focuses mainly on assessment, not NOC management
3	E-Governance for Public Service Management	Research Paper	—	Digitalization of government services and applications	Does not specifically address fire inspection
4	Digital Inspection Management System	Research Paper	—	Online inspection scheduling, records and reporting	Limited fire-specific functionality
5	Fire Safety and Building Compliance Management	Research Paper	—	Building safety requirements and compliance monitoring	Lack of integrated application tracking and NOC workflow

5) Motivation:

The existing fire inspection and NOC process can involve manual paperwork, repeated visits, difficulty in tracking application status, and delays in communication between applicants and department officials. A centralized web-based system can digitize these activities and provide a transparent workflow for application submission, inspection, compliance verification, and NOC management.

6) Objective(s):

- To develop a centralized web-based system for managing fire NOC applications. To provide online application and document submission.
- To manage and schedule fire department inspections.
- To allow officials to record inspection findings and deficiencies.
- To provide compliance tracking and re-inspection management.
- To generate and manage Fire NOC after successful compliance.
- To provide application status tracking and notifications.

7) Proposed work with Methodology:

The proposed system will provide separate interfaces for applicants and fire department officials. Applicants can register, submit Fire NOC applications, upload required documents, and track their application status. Department officials can verify applications, assign inspections, record inspection findings, identify deficiencies, and request compliance from applicants. Applicants can submit the required corrections or documents, after which officials can conduct re-inspection if required. Once all safety requirements are satisfied, the system will facilitate NOC approval and generation. A centralized database will maintain application, inspection, compliance, and NOC records for easy tracking and management.

Application → Document Verification → Inspection Scheduling → Inspection(Digitally) → Deficiency/Compliance → Re-inspection → Approval → NOC

8) Software & Hardware Platform:

Software: React.js, Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, REST API, VS Code, Git/GitHub

Hardware: Intel i5 or above, 8 GB RAM, 256 GB SSD, Windows 10/11

Department of Information Technology

9) Project Group Information:

Group No.	Roll No	Name Of Student	Contact No.	Email-id	Sign
13	35	Yogesh Kumawat	9076307207	yogesh573614@gmail.com	
	33	Aniket Kolekar	8928077939	aniketkolekar2004@gmail.com	
	27	Apekshit Kalebag	9967299707	kalebagapekshit@gmail.com	

To be filled by Approval committee members:

10) Observations/Remarks by faculty:

11) Recommended: Yes/No

12) Names of Approval committee members (name & sign):

a. _____

b. _____

c. _____

d. _____
