INSTITUTE VISION & MISSION

VISION:

"To become one of the outstanding Engineering Institute in India by providing a conducive and vibrant environment to achieve excellence in the field of Technology".

MISSION:

"To empower the aspiring professional students to be prudent enough to explore the world of technology and mould them to be proficient to reach the pinnacle of success in the competitive global economy".

INFORMATION TECHNOLOGY DEPARTMENT

VISION:

To emerge out as a prominent department offering a programme in its pursuit for academic excellence in order to develop professionally competent and socially responsible Information Technologists capable of meeting industry demands and social obligations in a vibrant global environment.

MISSION:

To strive towards building an atmosphere that will be a catalyst for innovative ideas and learning. Providing IT students with various opportunities and experiences that can help them to thrive and prosper through a blend of academics, practical exposure and research programs. To pursue successful careers in a global environment.

Program Educational Objectives (PEOs)

PEO 1	To impart learners with sound knowledge of basic sciences and core engineering fundamentals.
PEO 2	To prepare learners use modern programming tools/technologies and develop competency to counter complicated engineering problems.
PEO 3	To prepare learners to be professionally competent and socially responsible to sustain and strive through the competitive, global/environment challenges.
PEO 4	To create a strong foundation in IT discipline and motivate learners undertake postgraduate studies, explore professional avenues or venture into entrepreneurship.
PEO 5	To inculcate personality traits and professional ethics.

Program Outcomes (POs)

PO 1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO 2	Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO 3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO 4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO 5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO 6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO 7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO 8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

Department of Information Technology

PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)

PEO1	Analyze real life problems and design user friendly solutions.
PEO2	To provide effective solutions for problems in sectors like healthcare, science, commerce, e-governance etc., by employing right set of tools and methodologies.
PEO3	Design and implement right IT infrastructural setups for any organization.
